

The right to adopt children given to homosexuals in the first place

The High Court of England upheld the denial of the right to adoption of children to a Christian couple, Mr and Mrs Johns, from Derby City because they are Christians. These parents had adopted 15 children and given them a good upbringing. The Court declared that under the new laws priority in adoption is given to homosexuals. It also declared Christian education to be detrimental to children because it does not bring them up according to gay standards. This is the attitude of the High Court of England as well as of the personnel of the Commission on Human Rights.

These days we live in chaos, when everything is turned upside down. Good is called evil, evil is called good, freedom is called dictatorship and dictatorship is called freedom. Poison is called a cure and a cure is called poison. This is the loss of reason and conscience. Both Europe and America have reached such a lamentable state. The blame for it falls on the apostatical Church hierarchy, which is no longer the light and the salt of the society but the opposite.

It is a shame and a crime that some Protestant Churches tolerate that their leading representatives live publicly as homosexuals. Sad to say, the Catholic Church too has betrayed the Gospel and the Holy Scripture as well as the whole Christian tradition. Some Cardinals (Schönborn, Husar ...) approve of this perversion even in the Catholic Church. In his book *"Discussions with His Beatitude L. Husar: On Postconfessional Christianity"*, Cardinal Husar approves of homosexuality. This contradicts the Holy Scripture and the whole Christian tradition.

President of Belarus has far more sense than the Church hierarchy or the adherents of so-called European standards. In November, Belarus was visited by Minister of Foreign Affairs of Germany, G.W., who does not conceal the fact that he lives with another homosexual. Belarusian President commented on the public outrage provoked by this Minister: *"I do not understand how a man can live with a man... Great public figures of both right and wrong orientation told us their tales here."* He said further: *"Homosexuality is not a normal way of life. We do not want it in Belarus."* German and Polish Minister, as delegates of the EU, offered Belarus a bribe of three billion euros with a view to the introduction of homosexuality. The President refused the bribe, unlike many politicians of Ukraine today. He was aware that moral values are worth more than money. He did not sell the soul of the Belarusians for thirty pieces of silver. We have to say that Belarus is better off than Ukraine. There is no bribery there and no economic crisis. This is, among other things, the fruit of the fact that Belarus is not a member of the PACE and is a truly independent state.

Christian values in the EU, just as it is seen in England, are regarded as antivalues, and perverted homosexual couples take priority over decent Christian families even in adoption of children.

Unless Ukraine stops on the way of the so-called small changes in the laws, it is only a matter of time before a homodictatorship is established here, children are permanently taken away from their parents and Ukraine loses her autonomy. Social workers have already prepared 30,000 children for adoption and through juvenile justice this number will increase manyfold. Homosexuality will cause deadly AIDS to spread at exponential rates and no one will be able to stop the autogenocide of Ukraine. This is the fruit of alignment with the so-called EU standards and International Conventions.

Our Ukrainian orthodox Greek-Catholic Church, in contrast to fallen-away Protestantism and Catholicism, clearly defends moral and spiritual values and the traditional faith of the Fathers which has been proclaimed and lived in Ukraine for more than 1000 years.
